

The Municipal Monitor™

Over the last 10 years, many issues that were once handled at the state level have been shifted to local government. Keeping your members up-to-date on local happenings is vital to any regional organization. Timely and relevant information can make a huge impact on business decisions. **Association Business Solutions (ABS)** has developed **The Municipal Monitor™**, a valuable member benefit that can be tailored for your group.

Each month, **ABS** will write a quick and easy-to-read municipal update to give your members timely information on what's going on in the district governments where they operate. Whether it is passage of a new law that affects business transactions or government plans for a major redevelopment project that could impact the local market, **ABS** will report on it to help keep your members better informed.

In addition to the newsletter, **ABS** can provide a menu of other related services focusing on municipal concerns for your members:

- Providing your organization unified representation on any major issue affecting the constituents
- Working with your legislative committee to coordinate municipal outreach with state and federal efforts
- Serving as a point of contact for members who want additional information on a particular issue. Members call us directly for research and follow-up.
- Promoting members' views on proposed and/or enacted municipal ordinances to local officials
- Facilitating meetings between members and municipal and/or county officials on various issues of concern
- Surveying members to ensure focus on municipal issues of greatest concern
- Representing members at various county and local meetings and functions
- Supplying background information of each municipality for your website
- Monitoring, reviewing, and/or analyzing local legislation and regulations

Contact **ABS** to develop a customized program for your organization today!
